Karen, Dan, Mackenzie & Garren

It's a pleasure for us to welcome you to the 2018 edition of the Pasture Treasures Female Sale. As we gear up for this sale and reflect back on the year, there are so many positives we can take from it. Another outstanding spring bull sale run, a much higher than expected commercial market in all classes, the overwhelming demand for high quality Simmental Influenced genetics. It will be that much more evident as the fall progresses how the heavy weight high performance calves on the marketplace will be the ones that demand the biggest premium. Agriculture always has its challenges, but with that also come some of the hugest rewards. It's very gratifying to see the top quality stock demand a premium, and the breeders that make that investment being rewarded for their hard work and efforts.

We are absolutely thrilled with the offering in this year's sale. The consignors and ourselves have dug as deep into our programs as ever before, and there will be cattle that leave a large void in our own programs. I can't stress enough the importance of selecting top end cattle to be offered to represent our programs. It is gratifying to see genetics that carry our prefix go out and make an impact in the industry. I applaud our consignors for embracing the same philosophy. One edition to this year's sale is a few more lots in the frozen goods section. With regards to the semen packages, we are offering small limited quantities to keep the genetics somewhat exclusive, but also to share with the industry. The embryo/flush opportunities are truly unique and very special. As always our sale is heavily influenced with bred heifers, as that is our program, with a couple front end opens to complete the offering.

This is a family fun event, so plan to join us Friday October 12. Supper is 5:30 with the sale to follow at 7:00. If you are unable to attend sale day, viewing can be done any time prior to the sale and any of our sales staff will be more than willing to discuss your needs.

See you there.

MY FANCY BAR NONE

When I saw "Barbossa" alongside his dam as a calf I had that gut feeling he was something special. We were fortunate enough to purchase him as a 9 month old calf, and watch him develop into the breeding masterpiece he has become today. "Barbossa" truly is in a league of his own. He has been our go to guy now for so many years in the heifer pen, and when I use the term "bomb proof" I don't use it lightly, but he truly is as "bomb proof" of calving bull as we have ever owned. "Barbossa" will be 9 years old next spring and will still be given a large pen to service. We didn't breed as many heifers to him this past year, as we snuck a few of our favorite cows in his pen as well, hoping to gather a few more daughters for our own herd. His calving ease is second to none, and he offers so many other great qualities, however I feel his greatest asset may be his daughters. They are females that out produce themselves time and time again, with built in fertility, longevity and many with the bonus of being polled. His dam is also one of the greats of the breed, still going strong at age 18! We have never marketed semen on "Barbossa" so the only way to get these genetics is through offspring or services. We thought it was only appropriate to have him open this year's sale catalogue after his huge contribution to our herd.

We decided this year due to "Barbossa's" age that we would only market one daughter, as we know his time maybe limited with us, and because he has been used exclusively in the heifer pen, many of the females bred to him have been sold. Simply we need to add a few more into our own herd. "Ermina" is the choice to represent him, as she combines all the great traits that have made him so valuable to our herd. She is a smooth polled, beautiful profiling heifer that combines calving ease, performance & longevity. The cow family she comes from has produced many high sellers in the past, and going back to "Native Son" adds one more shot of longevity, as he naturally bred until age 13. This is a female I find very difficult to part with, we hope she makes tons of money for her new owner.

Exposed to Exposed to Virginia Precision 16C -1135400- March 27 to May 25. Observed bred April 4, ultra sound safe due January 14, 2019.

I truly believe you can never not be herd bull shopping. That was the case when "Radioactive" was up for sale this spring, where he was the high selling bull at Ferme Gagnon Sale. He is a bull that offers an outcrossed pedigree for our program. He is blood red, very smooth fronted, with big dark feet, a powerful cow family and offers the polled gene as well. He was used only on heifers this year, but I feel he is a bull that will work well on cows too. In my opinion a great calving ease bull is one of the most difficult things to source. We want one that calves, but also produces rock stars, that can stand in with the big performance calves. We feel as though "Radioactive" may fit that ticket. There will be several heifers bred to him in the sale this year, but we are also going to offer a limited amount of semen on him. This will be the only semen marketed on him for the 2019 breeding season. He will enter stud after the sale, as we have in herd use only on him right now. Exportable semen will be drawn at Alta Genetics. We will offer 2 packages of 5 straws each, with the opportunity for the buyer to purchase additional an additional 5 or 10 straws at the same value.

"Etasha" comes from one of Mackenzie's 4-H cows, who to this point has produced all heifers, so Mackenzie felt that offering one of this cows daughters for sale would be the right thing to do. Interestingly her sire "Moomba" is a bull I initially had no plans on selling any daughters on, as we lost him with no semen bank. This certainly adds value to this really nice female. She is very eye appealing, with exceptional length, and a superior cow family to back her up. To me she is going to be a female that will continue to develop and improve every day. I think her potential is going to be phenomenal and the mating to "Radioactive" just seals the whole deal.

Exposed to FGAF Radioactive 030E -P1204413- April 1 to May 25. No observed breeding, ultra sound safe to mid April breeding, due late January 2019.

This is without question one of the toughest heifers we have ever parted with. I absolutely love everything about this female, then combined with the fact that she is a limited edition just compounds her value to us. "Allegro" has had the look from the day she was born, the paint job is merely a bonus. The pedigree is absolutely loaded from top to bottom. We were extremely fortunate in the fact that "Moomba" did run heavy to heifers the first year, with only one bull calf being sold to McManus Simmentals for \$18,000, another 6 this spring averaged \$8250. These 3 daughters will be the only three offered for sale, and never duplicated. Huge value here, take advantage, one of the best females we have ever offered for sale, and has a uniqueness all of her own.

AI'd to Richmond Regis -507260- April 11. Exposed to Virginia Precision 16C-1135400- April 19 to May 25. Ultra sound safe to AI, due January 21, 2019.

"Ellery" is a female that comes from the same cow family as "Allegro". "Ellery's" grandmother is a full sister to "Tulsa" the dam of "Allegro". She is one of the youngest in this years' sale and is a powerhouse. We purchased her dam from Virginia Ranch, as the high seller in the Western Harvest sale a few years ago. She was our pick of the bred heifers, and has not disappointed. She had a beautiful female in last years' sale selling to Star West Farms. As I had stated with the "Moomba" heifers we originally had no plan to sell any of them but felt as though they needed to be shared with the industry. I felt as though "Allegro & Ellery" were complimentary to one another so that's why they are in. Once again keep in mind these will be the only ones ever offered for sale. A true collector's item.

Exposed to Virginia Precision 16C -1135400- March 27 to May 25. No observed breeding, ultra sound safe to mid April breeding, due late January 2019.

"Paparazzi" was actually slated to be sold last year as a calf in the 50/50 sale in Agribition, then we looked at our schedule with fall run, and decided to opt out. Needless to say she was a standout then and she still is today. I can't say enough good things about our "Entourage" daughters, and they were certainly noticed in last year's female sale averaging over \$9000 as a sire group. They are phenomenal producers, and are front pasture type cows as well. The dam of "Paparazzi" is a beautiful "Maximus" daughter from a cow we purchased from Eagle Ridge tracing back to "Metro, Westdrums Andrew, Moses & Salamon" impressive to say the least. We sold a full sister to her in the sale a few years ago, selling to BBBG (the Three Amigo's) in Quebec. She more than paid for herself on her first calf. "Paparazzi" is a donor cow in the making and is bred back the right way as well. She is right off the top of our herd.

There is little doubt in my mind you will find "Cascade" sale day. This is a powerhouse that is also extremely eye appealing. Her dam is a true workhorse, with great lineage, and is sporting a full brother to "Cascade" that certainly has the look to be one of the feature bulls in next springs' bull sale. I think the mating to "Precision" will be totally awesome. He sired the second high selling sire group this past spring in the bull sale at \$10,250, not shabby for his debut. A heifer calf from this mating would be great, but a bull calf will absolutely blow your hair back. We had "Precision" in a different breeding pen this spring and he's a crafty bugger when he's breeding. If you're not there you don't see them get bred. Ultra sounds were done early so we are very confident on the breeding dates.

Exposed to Virginia Precision 16C -1135400-March 27 to May 25. No observed breeding, ultra sound safe to late March breeding, due early January 2019.

"Elcie" is the youngest heifer in our offering this year. This has been a tremendous producing cow family for us, producing the second high seller 2 years ago selling to Silver Lake Farms, MB and another high seller in last years' sale to Gary Waldron, AB. "Elcie" is off of a fabulous "Jahari" cow that has been rock solid for us. We have dug in deep on this sale, and a heifer like this may slide a little under the radar. Look her over but don't overlook her, this is a very special young heifer with a bright future. As an added bonus she is one of only a handful bred to "Barbossa". Trust me there is extra value to be found here.

Exposed to FGAF Barbossa 707X -P725835- March 27 to April 18. Observed bred April 11. Exposed to Virginia Precision 16C -1135400- April 19 to May 25. Ultra sound safe to observed date, due January 21, 2019.

I guess everything happens for a reason, "Shazam" was to be lot #3 in this springs bull sale, however we were forced to pull him from the sale. After spending an extended time at stud, we brought him home and put him to work on a late breeding group. We have since decided that he will be added into our own bull battery. The options he gives us are endless. He boasts the calving ease and polled factor from the "Barbossa" side. Extra performance and muscling from "French Attack". Built in color all the way through the entire pedigree, loaded with pigmentation, and being a non-dilutor, he will be used on both Fullbloods and Purebreds. One of "Shazam's" greatest qualities is his disposition. We halter broke him in an afternoon, Mackenzie showed him at YCS, (where he was Reserve National Bull Champion), and to pull him in to get clipped we just threw a halter on him with his breeding group in the pasture and led him out. He is straight goods. Semen is stored at Alta Genetics. We will offer 2 packages of 5 straws each, with the opportunity for the buyer to purchase an additional 5 or 10 straws at the same value. This will be the only semen market for the 2019 breeding season.

It's always gratifying to see cattle we have sold excel at their new home. Much is the case with "Elyta's" sister "Dharma" who was last years' high selling lot going to Double Bar D Farms, SK. "Dharma" has been fast tracked to their donor pen and I see no reason why "Elyta" can't do the same. Her sire "French Attack" has completely surpassed our expectations in a very short period of time, although her dam was a mature cow when she came to us she has been as steady of producer as we have. She is a cow that works with every sire choice we have thrown at her. Now to seal this whole deal off keep in mind "Elyta" is the only "French Attack" female we are offering for sale, and she is smooth polled too. Being bred to "Radioactive" I can only imagine the possibilities here. This is a calf I am very anxious to see.

AI'd to FGAF Radioactive 030E - P1204413- March 29. Exposed to FGAF Radioactive 030E - P1204413- April 1 to May 25. Ultra sound safe to AI, due January 8, 2019.

It's hard to believe "French Attack" has only been with us for 2 calf crops. He seems like such an old reliable go to guy in our breeding pens. Regardless of bulls or heifer calves, they have a look about them that is undeniably good. His first set of bull calves hit the sale ring this past spring for us averaging \$10,685, and no doubt if "Shazam" would have been there sale day that number would have been much higher. His calves have his same incredible laid back attitude, tremendous depth, length, foot structure, hair and growth. We have sold a limited amount of semen on him, and decided to offer it somewhat exclusive again with small minimal packages available. We have decided to sell 2 more packages of 5 straws this year. This will be the only semen marketed on him for the 2019 breeding season. The buyer will be given the option to take an additional 5 per lot at a \$50/ straw discount from the purchase price of the original lot. Semen is exportable - stored at Alta Genetics.

"Destiny" is a larger framed performance heifer, with exceptional length and a perfect paint job. Her dam has been a very reliable producer for us in the time we have had her, and always throws performance and style in her calves. "Destiny" is a female I expect you will appreciate today, but absolutely adore as she matures. She has been named "Destiny" for a reason, as I believe greatness is in her future. The mating to "Radioactive" should be superb. The resulting calf regardless of polled or horned should be extremely dark red, heavily pigmented, and I feel the two will really complement each other. This will be a great cross.

Exposed to FGAF Radioactive 030E -P1204413- April 1 to May 25. Observed bred April 14, ultra sound safe, due January 24, 2019.

Here is a favorite heifer of mine. "Emily" comes from an extremely consistent producing cow family, who produced our lead off bull at this springs bull sale. "Emily" has a sweet disposition, and takes everything in stride. She is deep bodied, and has the typical easy fleshing ability that "Intuition" transmits into his offspring. I guarantee if we didn't have a production sale this is a female that would be ranked high on my keeper list, and is a female that will work with such a huge selection of bulls. As an absolute added bonus she is one of the few mated to "Barbossa", this calf should be wicked good. Put a big check mark by her.

ANCHOR D REMINGTON 154J
RICHMOND MISS IMAGE 21J

This will be a super cow. "Evangeline" won't be the shiniest prettiest heifer sale day however she will be an absolute workhorse. This is as solid of cow family as we own, going back to our good old "Image 21J" cow. One of the biggest mistakes we have made is not adding this cow in our donor pen. She was a no miss cow, and every one of her offspring has risen to the top. This is the same cow family that started Garren's cow herd, producing "Tyra" who has been the back bone of herd bulls like "Churro, Molokai, & Mr. Gibbs", and the dam of "Evangiline" is a full sister to "Midas" who sold to Dwayne Horst, ON & the York's in Australia. She is bred a bit later, as you can see "Barbossa" was pulled earlier due to injury. She was in his pen when he was hurt and we missed pulling her in time, so missed a cycle. Don't discount her, very little guess work here, this will be a producer.

Exposed to FGAF Radioactive 030E -P1204413- April 11 to May 25. Observed bred May 1, ultra sound safe, due February 10, 2019.

One of the unfortunate things about good cows, is they get old. "Deborah's" dam is 14 years old, as was her grand dam. Both were rock solid producers for us. At the time we selected sale heifers, she looked as though she would be with us for another year, however it appears that will not be the case, so this will be her last calf. We really have mixed emotions about parting with "Deborah", as I know what the capabilities of this heifer are. I encourage you to look beyond color, there is zero doubt in my mind for dollars invested this may very well be the heifer that delivers the largest return. This is the first heifer out of "Mesquite" that we have ever sold by auction. I really encourage you to mark "Deborah" high on your list, if producing bulls is your business, she needs to be a part of your business, as honest of female as you will find.

Exposed to FGAF Barbossa 707X -P725835- March 27 to April 18. Observed bred April 17. Exposed to Virginia Precision 16C -1135400- April 19 to May 25. Ultra sound safe to observed date, due January 27, 2019.

"Vedalia" is a fan favorite for sure. I really encourage you to go back and look at "Deborah" (lot #15) after you look at "Vedalia". Her dam is a sister to lot #15, and this is a good example of what this cow family can produce. I absolutely love the body capacity, the broad top, big deep rear ¼, hair coat, and the skull structure of this female. She just has bull producer wrote all over her, which is what this cow family has done for us time and time again. We do have a few more of these "Epic" females in the sale this year as we have a number of them producing in our herd now and they are extremely good. We sold a sister to her a few years ago in the sale, and Garren bought her so we obviously see her every day. She has turned into one of his very consistent producing cows. She's a dandy.

AI'd to Anchor D Remington 154J -523539- April 12. Exposed to Virginia Precision 16C -1135400- April 19 to May 25. Ultra sound safe to AI, due January 22, 2019.

"Evanna" is the largest framed heifer in this year's sale, and if you want power and performance, here it is. She comes from the great "Star Gazer" cow family, and her dam was a great producer for us over many years. There is no lack of performance here, as her dam consistently produced power each and every time. I would throw a moderate framed deep bodied bull on her, and she will smoke them out of the park all day long. As I stated earlier our "Epic" daughters in production are extremely good, and are females that can produce both outstanding bulls and heifers, and look the part in the process. Great cow family to back this one.

"Elaine" is another heifer I am extremely high on. Her dam is a full sister to our lead off bull from 2 years ago, and I can't say enough good things about the "Maximus" daughters. The "Maximus - Epic" cross has been extremely consistent, and without a doubt one of the best genetic combinations we've had. The "Peach" cow family is small, as she was the results of an embryo we purchased. Even though she is the lone ranger in this cow family, she is a fabulous cow and we are beginning to gather a handful of her daughters for ourselves to expand this line. I think the future for "Elaine" is extremely bright and is certainly a favorite heifer of mine.

Exposed to FGAF Radioactive 030E -P1204413- April 11 to May 25. Observed bred April 18, ultra sound safe to next cycle, due February 18, 2019.

Here is a big time performance heifer. When Heimstra's dispersed of their cow herd, we purchased her grandmother "Paisley" as one of our top picks in their sale. They retained just a handful of cows, and a few years later we were given the opportunity to purchase the remaining balance, and "Willow" the dam of "Erin" was in that group. What a great cow family they have been for us, always producing big performance cattle with extra growth and stretch. We do have a handful of "Throttle" daughters in our herd, and I can honestly say this bull was a very well-kept secret. "Erin" won't be the one that rises to the top sale day, but I promise will be a steady producer for someone.

AI'd to Richmond Regis -507260- April 3. Exposed to Virginia Precision 16C -1135400- April 19 to May 25. Ultra sound safe to exposure breeding, due February 3, 2019.

If you are only looking for that one female this year that could put you on the map, then this very well could be your heifer. Every year when we pick sale heifers, we choose one untouchable, which is our heifer. "Edwinna's" sister last year was the chosen one. Her dam "Zeon" is a cow that has quickly risen to the top in our herd. She is far from the first cow you notice, but every year when we wean she is always noticed, due to what she brings in. This cow is a big time producer, and will no doubt find her way to our donor pen very soon. If cow families and longevity are important to you then she rocks that category as well, and boasts extreme calving ease in the pedigree, while excelling in performance as well. Interestingly enough "Zeon's" 5 calves to date 4 have been Polled, all from horned sires. "Edwinna" is a smooth Polled beauty that will be found at the top of the pen sale day.

Exposed to Virginia Precision 16C - 1135400- March 27 to May 25. Observed bred April 17, ultra sound safe, due January 27, 2019.

Although "Emily" is one of the younger heifers, she has been a heifer that has been ear marked for the sale from a very early age. She has always stood out in the group displaying style and feminine beauty, while boasting performance. She profiles as well as any heifer in the group, and has a different twist to her pedigree compared to many others. This is a big time heifer that will be extremely productive, and as honest as they come. These are the type of females I absolutely love to sell, as you know they will go out and work and look great while getting the job done, and have the capability of contending with the top in their new home. Her breeding to "Barbossa" could very well result in a home run on her very first calf. Rock solid choice here.

Full Sisters

Mackenzie's cow numbers are where she wants to maintain so she has really pulled out all the stops this year with her 5 consignments. This is a tremendous set of twins, who had a full sister in last year's sale going to Nolar Farms, and a full sister by blood that went to Javier Jauregui in Mexico. Their mother is as picture perfect female as you could possibly make, and looks in mint condition year round. This is a pair of females that will be super easy to breed working with a huge selection of bulls. Analyze this pair they are plumb good, and you won't go wrong with either one, or double down and take the pair, they are the right kind.

"Evelyn" is a family favorite, and ask Grandma & Grandpa who their favorite cow on the place is and I'm pretty certain they are going to tell you "Clarabelle". This is Garren's lone consignment this year, and yes she is a little smaller than the rest of the heifers, but has as much potential as any of them. Her dam unfortunately had a stomach issue last year, and needed emergency surgery to save her, so "Evelyn" didn't get all the groceries she needed. Having said that this is unquestionably Garren's #1 cow family and one of the best on the ranch. "Evelyn" is a sister to "Jezabelle", the dam of "Gisele", who no doubt left an impact at the National YCSA Show. She will be like the little engine that could, and I promise she will deliver the goods. Don't pass her by.

Exposed to FGAF Radioactive 030E -P1204413- April 1 to May 25.

For a number of years "Regis" was our go to guy in the heifer pen. He always supplied us with great calving ease. His calves regardless of sex were very marketable, and left us several outstanding daughters for our own program. As you can see our program relies very much on our walking bull battery, but the past couple of years we have dipped back in the tank for "Regis". He typically is very strong on throwing pigmentation, and making them red. If you want to add an extremely predictable calving ease bull into your tank that will no doubt produce marketable calves he is a great choice. Semen is stored at Alta Genetics and is exportable to the US as well. We will sell 2 lots of 10 straws.

This is another of Mackenzie's heifers, off of one of her top producing cows, "Angelica", who happens to be a full sister to "Entourage". "Elouise" reminds me very much of an "Arnold's Image" daughter in both her body type, and color pattern. If you've ever had "Image" daughters in production, you know how good they can be. About 1 in every 50 "Regis" calves comes with minimal or no pigmentation, and I guess it was her turn, regardless this will be an outstanding producing cow. I expect big things from this female, as she has the lineage on both sides of the pedigree to produce among the best.

The first calf crop for "Precision" is officially in the books, and wow what a job he did. His sire group in this springs bull sale was very well accepted, siring the 2 high sellers, and ending up with a very respectable \$10,250 average. Pretty darn good I would say, especially considering his group was mostly from first calving heifers as well. We were extremely pleased with the quality of calves he produced, as well as their calving ease and overall growth. This is a bull that has become a force to be reckoned with in our bull battery. This years' offering will feature many services, as well as four direct daughters. They may not be at the very top of the sale, but I believe they have the potential to produce near the top themselves. His sons will once again be very popular next spring as well.

"Eclipse" is a heifer I have to admit I struggled with putting in the sale. She is a heifer I feel may get looked over slightly, but has huge potential. She is a more moderate made female, very smooth fronted, dark red and beautifully pigmented. She does lack a little of the horse power some of the other heifers have, however this will be a female that you can throw absolute raw power at and she should blow you away time and time again with what she will produce, while moderating birth weights, as her pedigree is stacked with calving ease. Let's see who has their studying done sale day as "Eclipse" will be a great purchase, with a super bright future.

Exposed to FGAF Radioactive 030E -P1204413- April 1 to May 25. No observed breeding, ultra sound safe to early May breeding, due mid February 2019.

If cow families are important to you, then "Etta" should be on your shopping list. Her dam is a direct daughter of "Tyra", who has been the pillar behind Garren's cow herd. "Etta" is an extremely long bodied heifer from a nice moderate made second calver, who ironically had a full sister that produced a "Precision" bull calf that sold this spring to the Willsie's. "Precision" ran a little stronger on bull calves last year, and this years' calf crop seems to be a fairly even split. I think much like "Barbossa" we will appreciate these females that much more in a couple years when they are in full production. This will be a very honest brood cow, with a little old school being bred to "Klondike Arnie". Something very special could be happening here.

AI'd to Klondike Arnie 250Z -216954- April 12. Exposed to FGAF Radioactive 030E -P1204413- April 19 to May 25. Ultra sound safe to AI, due January 22, 2019.

The dam of "Equinox" has been a solid producing cow for us for many years. This year she has produced calf #12 for us, who happens to be a full sister to "Equinox", so she became expendable. This cow produced one of my absolute favorite heifers a few years ago, selling to XRC Simmentals. "Equinox" may not have the chrome, bells or whistles some of the others have, but I dare to say she will be a rock solid producer, that will more than likely out produce herself. Huge potential here. If you have champagne taste on a wine budget, then check this one out. We will have to pay for a blood type on this calf as we never seen her bred, and had to pull "Barbossa" when he got injured, but feel she is safe to him. Regardless which bull she is bred to this calf will be good.

Exposed to FGAF Barbossa 707X -P725835- March 27 to April 18.

For this year's sale, with the exception of "Mr. Gibbs" we tried to have a representative from every one of our herd bulls in the offering. "Ellulah" is the lone entry from "Aegon". We are very pleased with the job he has done for us. He is a really sound made bull, with great muscle expression, a deep quarter, easy fleshing, with lots of athleticism, longevity, and a strong color producer. "Ellulah" is from one of our no miss cows, who seems to work with a huge variety of bulls. In her 10 natural calves, this is only her third daughter, and all 7 bulls have been in the bull sale which include 3 that went on to purebred herds. Her only daughter in production just happens to be the grand dam of "Shazam", "Ellulah" is her second daughter, and #3 is at her mom's side and likely will stay here on the farm. Long story short, this may be the only chance to ever buy a daughter from this cow, which happens to be one of our top producers, and is the only "Aegon" heifer to be sold. Oh look who she's bred to as well. MIC DROP!!

AI'd to Starwest Blueprint -800548- March 31. Exposed to Virginia Precision 16C -1135400- April 19 to May 25. Ultra sound safe to AI, due January 9, 2019.

We are doing things a little different this year in adding in a few semen lots. Beings this is the last of the "Windsurfer's" we felt that offering a little bit of semen on the old boy would be fitting. "Windsurfer" was a powerhouse, who left us some extremely marketable bull calves and some phenomenal females for our own herd. He produced last year's second high selling female that sold to Mark Land & Cattle, and if you remember reading the footnotes you will have seen me mention she was my pick of the heifers. We had the misfortune of losing "Windsurfer" 2 winters ago, and although he is no longer with us, several daughters are representing him well, and tend to show a lot of the same great characteristics of their paternal grand dams, "Kananaskis & Helga" that right there is a couple of pretty impressive names. We will offer 2 lots of 10 straws on this great old bull. I know he will have as much influence in the buyers herd as he has had in ours. Semen is stored at Alta Genetics and is exportable.

First of all I would like to point out what a fabulous name Mackenzie chose, that's awesome. "Dixie Chick" comes from one of her old 4-H cows, and just happens to be a full sister to her last year's 4-H heifer "Liberty". This cow is a true work horse, which produces at or near the top every time. "Dixie Chick" is wicked good, not much you would change here. Get ready to deposit some big cheques, this female has bull producer written all over her. We tend to breed the heifers for calving ease and I have a philosophy that if they have that first one problem free, you will likely have a better cow for many years to come. Having said that I am also greedy, and don't just want to settle for a calf on the ground, I want one that is good and competitive. The breeding of this heifer to "Radioactive" gives me goose bumps, and I would dare say this is the way we would likely have bred her if she was an old cow as well. I think the potential of this cross could be a home run.

Momma cow. "Electra" has that stamp on her already, and comes from the "Sapphire" cow family. This is "Ruby's" final calf, as she was one of those cows you could always rely on to produce a good one. This is the same cow family that produced "Kael" who was our high seller two years ago, going to Canadian Donors. Her bull calf "Outlook" was this springs second high seller, going to Crossroad Farms and Canadian Sires. We have a handful of ET calves from "Kael" as well this year and they are awesome. Nothing overly fancy here, just straight goods. "Electra" will produce many dollars in her time no doubt in my mind.

*Exposed to Virginia Precision 16C -1135400- March 27 to May 25.

"Eloise" was in and out of the sale so many times I'm certain we made her dizzy. This is a heifer I truly would love to have kept. She provides us outcrossed genetics for our own herd, and the "Salton" cattle I have seen to this point have been very impressive. We purchased her dam from Red Willow Ranch, and in my opinion, her grand dam is one of my favorite cows in their whole herd, so when the opportunity was presented to own a grand daughter, we jumped at it. This is a very stylish heifer, loaded with pedigree, performance and able to moderate birth weights in the process. A hell of a cow in the making here, that when she matures you will be certain to admire that much more.

Exposed to Virginia Precision 16C -1135400- March 27 to May 25.

Don't judge a book by its cover. I know a little white here may throw a few people off, but look beyond there is something special here. For the true pedigree enthusiasts, find another with this genetic blend, it will be a very short list I promise. We purchased her dam as a bred from Clearwater Simmentals, and I am confident in saying she could have been the buy that fall. WOW, what a beautiful female. I have huge expectations of this young cow and am truly excited to see what she produces for us in the future. I have a feeling that "Emerald" may truly be the diamond in the rough, and I think she has tons of potential. Sharpen your pencil, and see if she figures into your plans.

As you can see with these last three heifers, they are all from first calving heifers we purchased. They all add a different twist to our program genetically, which makes them a bit hard to part with as well. "Estela" comes from a very nice young female we bought from Boisvert Simmentals in Quebec. I haven't seen a lot of "Pharao" cattle around, but the ones I have seen I have been super impressed with. They appear to be tremendously broody, easy fleshing and hard working. I think he is a bull that is a bit of a well-kept secret. We haven't seen huge numbers of offspring here in the west, but several in the east. He provides calving ease for sure, and the luxury of the polled factor, but I feel his greatest quality may very well be the daughters he produces. I have a feeling this heifer is going to do some big things.

AI'd to Anchor D Venom 111W -P716203- April 12. Exposed to Virginia Precision 16C -1135400- April 19 to May 25. Ultra sound safe to AI, due January 22, 2019.

38 TREASURE LOT

We have gotten away from doing the "Treasure Lot" the last few years, however it will resurface again this year, but with a whole new twist. No guessing as to what it is this time, but it will require some homework. We have decided to offer something that we have never done before, and quite honestly comes right from the heart of our herd. We will offer the opportunity to dip into our tank and choose 3 embryos from ANY combination you choose. That's right, ANY cow you choose. Cows like "Star Gazer" "Dorothy Jane" "Desiree" "Fergie" "Emma" "Elexis" "Molly", they all still have inventory, but there are also the new kids on the block like "Saphire" "Precious" "Unique" "Martini" to name a few, and many more. Much of the guess work is done, but certainly if you have a favorite cow on our place inquire, there may be an opportunity to dip into those genetics as well. Tried, tested and proven, it's all there. Purebred, Fullblood or Full Fleckvieh there is something for everyone. Anyone requesting an inventory, please call prior to the sale, and an updated list will be provided. We ask that the pick is done by the end of December, and also keep in mind this is a work in progress, as cows will be in the flush program currently. We will offer 3 embryos of your choice guaranteeing one pregnancy (if using a certified embryologist), however keep in mind many of these cows are gone so we can't guarantee replacement on the identical mating if a pregnancy isn't obtained. Mix and match, that's your call. Some embryos are exportable, ask for details if required. This is a golden opportunity that likely will never be offered again. Have fun!

"Tonita" has led an exciting life. She was sold as a bred heifer in our production sale in 2008 where she was the high selling bred heifer going to Prospect Hill in Ontario. She then sold in their dispersal sale as one of their high sellers to Bar 5. We purchased her back in their dispersal and added her directly into our donor pen. Her first calves for us will be weaned this fall and although they are small in numbers they are high in quality. We are going to offer the opportunity to flush her to the bull of your choice guaranteeing 6 embryos, anything over 10 will be split equally with Anchor D. She is no spring chicken, but still looks incredibly good for her age. She is royally bred, being sired by the great old "Evan" bull, which has done a bang up job for the industry, and her dam is none other than "Irene" the \$36,000 high selling heifer calf we syndicated on with Buzzard Hollow & Bouchard. Flush will be done by Janzen - Brogen / DRI and if the buyer so chooses we will supply semen on any Anchor D herd bull, or you can supply your own, the choice is yours. Anchor D will pay for the cost of the flush, and will make the embryos exportable if required. Ready to flush this fall.

A family favorite in "Daphine". Every year there is that one heifer that just thinks she should become a pet, and this year it's "Daphine". This is a heifer that will be a solid bull producer. She is from a heifer we purchased from Double Bar D as a bred, from one of their feature cows. She offers the unique blend of Fleckvieh & Red genetics to complement one another. This is a beautiful long spined female with a very strong top, a very feminine front end and will no doubt have a beautiful udder. She has tons of personality, and I am certain she will become a favorite at your farm much like she has become one here. She will be a money maker.

Much like the Fullblood heifers, we kept things pretty simple with the breeding program. As you can see all the Purebred heifers have been exposed to "Admiral". We were very impressed with his calving ease. His calves certainly started out small, but appear to be making a move now. "Eva" is a heifer we are extremely high on. This is a very capacious heifer, with a deep chest floor, and tons of red meat. She will be extremely easy keeping, and comes from a very solid producing cow family. I can't say enough good things about our "Louie" daughters. His offspring were extremely easy to market, as they supplied calving ease, but more importantly they were the right kind. "Louie" unfortunately broke his leg, and with no semen in the bank there may only be a few sold next year if any.

Exposed to Double Bar D Admiral 446D -PG1176505- March 27 to May 25. Observed bred April 7 & April 23, ultra sound safe to April 23, due February 2, 2019.

"Whitby" is another heifer that I just see bull producer written all over her. This is a tanky made female that is just plain good. We have a full sister producing in our herd, and comes from a very good old Fleckvieh cow family. When we started developing our Purebred program we started with a core of solid Fleckvieh cows that we had already built a program around on the Fullblood side, so I am extremely confident in saying she will be a bull producer, but leave wicked good females in the process as well. This is the same cow family that produced lot #15 & #16, so as you can see this is no accident, she is bred to deliver the goods.

Exposed to Double Bar D Admiral 446D -PG1176505- March 27 to May 25. No observed breeding vet feels she is bred late March, ultra sound safe, due early January 2019.

"Esther" is a dark red female that has really popped out in the pen ever since she was a baby. She comes from a real good old producing cow family, and I can honestly say the handful of "Robin Hood" cows we had always delivered time and time again. "Esther" has the added bonus of being Homozygous Polled, and is already starting to lay down an udder. There will be no lack of milk in this pedigree, should be fairly moderate framed, and should be very easy fleshing. Lots of calving ease stacked up in this pedigree as well. Her offspring will be highly marketable.

I have to admit I dropped the ball a bit on the creative names this year. There are 2 red baldie heifers in the sale this year that I actually thought we would probably keep, and I was getting close to being done registering calves and they ended up with a very generic name. This is the very last daughter from our good old "Macenta" cow, same cow family as the previous lot. She is our only "Westcott" in the sale, and I am very happy with our "Westcott" cattle. No they aren't fancy clean fronted show cattle, but they are feedlot friendly rancher cattle that will do a lot of good things in the industry. This will be a very steady producer that you won't break the bank to own, but will be a great brood cow. There will be big returns here for dollars invested.

Exposed to Double Bar D Admiral 446D -PG1176505- March 27 to May 25. No observed breeding vet feels she is bred mid April, ultra sound safe, due late January early February 2019.

"Elita" is the first of the "Glacier" daughters. He was our high selling Purebred bull a couple years ago, selling to Soderglen Ranches. We really appreciate the strong working relationship we have with them and used "Glacier" for our winter breeding, as they are a summer breeding program. I liked the bull calves we sold off of him this spring, however I feel his greatest strength will be in the daughters he produces. "Elita" is a heifer that has risen to the top of her class early on. I noticed this heifer at her dams' side, and she has only kept getting stronger. This is a well sculpted heifer that combines power with refinement and femininity. She should be a female that can be mated with a huge variety of bulls and consistently produce. This is a much better heifer than her picture indicates.

Here is the other very unoriginal name. "373E" is a heifer that I really feel will totally out produce herself. She is an extremely quiet long bodied female from a very steady producing cow we bought from Parkhill Ranches, who always moderates birth weight and gives us a real honest calf. She is a 13 year old cow that looks very youthful and is absolutely as sound as they come. Like I mentioned before this is a heifer we had originally thought of keeping due to the fact she is fairly plain to look at, nothing extreme in any way but just honest. Having said that she is a heifer that should fit in everyone's budget, and be very productive and be a money maker for many years to come. The breeding to "Admiral" should result in a moderate birth weight calf that should cross well on her.

"Enalia" is the first of the black heifers this year, and is a heifer I grow to appreciate more every day. Her dam is a very nice young "Louie" daughter from a fabulous old Arnold Brother cow. There is a lot of performance in this pedigree, and I think this will be a female with a very bright future. She is really long bodied, smooth fronted, and will develop into an impressive mature cow. As I mentioned before on these "Glacier" cattle I think they will be outstanding productive females, backed with a stellar cow family. This is just a real solid made heifer.

If you were to have asked me last fall if I was selling this heifer I would have most likely told you no. I had full intentions on keeping her, as she was a little smaller at weaning time, being a twin, a little younger, and the last calf from one of our extremely good old purebred cows. "Elga" comes from the "Macenta" cow family, who as you can see 3 of our 10 purebreds come from this cow family. I like everything about this moderate made female. She is easy fleshing has a great disposition, lots of hair big topped great feet and legs and yes a great cow family. She is bred a bit later for our program, for others is perfect. I think this heifer has huge potential and will leave a void in our pen.
Exposed to Double Bar D Admiral 446D -PG1176505- March 27 to May 25. Observed bred May 3, ultra sound safe, due February 13, 2019.

Our last lot, and I left a powerhouse until the end. I am a huge "Super Duty" fan. "Blitz" comes from a highly productive Parkhill cow, which happens to be the dam of their herd bull, "Beowulf". This is a female that will have limitless power and production. I think the mating of "Admiral" to her should work very well. I would breed her to something moderate with a moderate birth weight and just see what happens. This one could hit a home run multiple times. Big beautiful and stylish are all words that could be used to describe her. Her dam has produced another powerhouse this year, and is no stranger to having her calves at the front of the pack.

Susanna is a moderate framed female that we believe will grow into a very versatile cow. Her mother is our number one ranked first calver with a remarkable udder. You can expect the same with Susanna, the Gold Digger females in production are phenomenal. Backed by arguably our most consistent cow family Susanna is sure to impress. It is not a coincidence that an outstanding heifer from the this cow family sold a couple years ago at this sale to the good people at Little Critter Ranch.

Annette came to us in calf from a very good B Bar C female we purchased out of the Jewels and Diamonds sale last fall and we couldn't be happier with the pair. We had already purchased a maternal sister and we liked her so well we had to get our hands on another. To say we place a great deal in cow families around here would be an understatement! If "Denae's" first try is any indication what she can produce she will raise her fair share of the good ones. Annette will mature into a soft sided broody cow that will know doubt do the same.

Offering 3 or 5 embryos off sire of choice

Here is an exciting opportunity to add the influence a young donor who promises to play a significant role in our breeding programs, and as we believe, the fleckvieh industry as a whole. Deloriss was admired right from birth for her powerful makeup and tying together many important traits. She combines length of body with unparalleled capacity through her middle and extension through her front end. As she has matured, she has developed a correct udder and stands on a set of large feet. Genetically she intrigues with a long list of influential sires and donors. This is a chance to choose the sire you would like to cross her with; go with polled, go with proven or go with new and exciting. Deloriss has the tools to work with a variety of bulls. All flushing costs will be covered by us. Flush to be completed prior to Jan 15, 2019.

We welcome Les back into our sale again this year, and really enjoy working with him. We have had a number of Parkhill cattle in our own herd over the years, and they are highly productive low maintenance, profitable cattle. The 3 heifers he consigns this year are very complimentary to each other. All deep bodied dark red females with lots of hair and appear to be very honest brood cows in the making. I am very impressed with the job their sire "Parkhill Red Edge 39Y" has done, as he has certainly stamped them the same. All three were AI'd the same to "Limitless" so be assured there should be no calving issues there. Good solid heifers.

A powerfully made solid red female who is a deep-bodied, big-haired, bull maker. I may be crazy for letting this sweetheart go. A different pedigree for many on the bottom side with a shot of fleck way in the back, the King Ranch cows have been top end bull producers for us.

Sired by our new herdsire 'Steakhouse', his first group of bull calves were extremely well received by our commercial customers at our bull sale this spring, with the 6 of them averaging over \$9K. He is a very aggressive breeder who sires very moderate calves at birth, and are vigorous with lots of grow later on. Steakhouse was mothered by a top end blaze faced matron who we really appreciated for her mass, udder quality, and broodiness when we toured Paul Abrams good cowherd and selected Steakhouse.

Bred early to our cherry red calving ease specialist, a son of Rimrock, we purchased this bull for his calving ease pedigree and smoothness. He bred 30 heifers for us in 42 days this spring, another attribute very important to us. Exposed to Mr Camden 5E from April 2-May 15, safe to very early exposure.

These cherry red, moderate framed Tom daughters really produce right off the bat. Sidecar Star is a deep bodied, big ribbed gal, with muscle shape and that bull maker look about her. We have several young Tom daughters working in our herd and are excited about their current and potential production.

Mothered by a larger framed, big bodied Rockstar daughter. The Rockstar cows are some of our best bull makers, as they are large volumed, easy fleshing and are good mothers and milkers.

Bred April 11 to CDI Rimrock 325Z, and safe in our vet's opinion. Exposed to Mr Camden 5E April 15-May 15.

A solid Venom daughter who is hard to fault-big middled, clean fronted with that big Cobra foot under her, she is another one that will lay down and have bull calves that will be very marketable. Mothered by a massive bodied, super uddered solid cherry red cow that has a top end bull calf on her this year.

Sired by Venom, Deeg's high selling bull a few years back. Venom is a massive individual with a great disposition and exceptional foot quality. His first bulls to sell this past spring were extremely well received, with the 10 sons offered averaging over \$9k.

Bred April 10 to CDI Rimrock 325Z, and safe to that date in our Vet's opinion. Exposed to Mr Camden 5E April 15-May 15.

The second of the two Venom daughters, and patterns so closely to her sister. Big ribbed, and clean fronted, this lady has what it takes to be a front pasture female. With another different pedigree on the bottom side, being mothered by an easy keeping Maxwell bred cow, who is cherry red with a great udder.

Venom stamped his daughters with muscle shape, rib and that big good foot. His bulls are outstanding individuals that commercial cattlemen really appreciate, but I think Venom's strength will be in his daughters. If the Cobra Event is any indication, Cobra influenced females are in demand.

Bred April 10 to the calving ease specialist, CDI Rimrock 325Z, and safe to that date in our Vet's opinion. Exposed to Mr Camden 5E April 15-May 15.

We thought it may be fun to bring a heifer calf to the sale to represent the up and comer's, and Shooter Girl was the favorite to represent the 2018 calf crop. Our program is built around tried and true, proven genetics that work in our less than perfect environment of harsh winters and dry summers, and this girl shows what can be done on hard grass in Eastern Alberta-Absolutely no grain has been fed to this calf, only her mother's milk and native grass, so buy with confidence that what you see, is what you get.

Sired by none other than Gunner; We bred a handful of heifers to Gunner, hoping for some females as we all know what tremendous cows these Gunner cows are.

Mothered by an outstanding 1st calver Ammunition cow, who was my favorite as a bred heifer. Deep bodied, extremely good uddered and an excellent producer who has a bright future ahead of her.

Along with WAG Cattle Co. we bought, Anchor D Sonic a few years back to be our leading Herd Sire. We now have several Sonic females walking our pastures, so we decided that this would be the female to kick off our first heifer to sell. Emerald is our top red heifer this year, with capacity, leg and length of spine, great disposition and should carry the calving ease traits of Sonic. Excellent udders go 3 deep Emerald's lineage.

A1'D March 13 MRL Sleep Easy 140D, exposure WAG Countdown 51C March 20- May 1st.

TERMS & CONDITIONS

TERMS: The terms of the sale are cash or cheque payable in Canadian Funds at par immediately following the sale. The right of ownership shall not pass until after settlement is made. All settlements must be made before any livestock will be released.

CERTIFICATE OF REGISTRY: After settlement has been made the buyer will be provided with the proper registration papers, duly transferred on the record of the Canadian Simmental Association. Further transfer to the herd books of other countries shall be at the buyers expense.

DELIVERY: Delivery will be made to purchasers in Central Regions of Western Canada, at the convenience of Anchor D Ranch, and buyers risk. Any animals going to other areas, trucking will be arranged by Anchor D Ranch at cost.

FLECKVIEH STATUS: Full Fleckvieh will be considered as Fullblood cattle tracing back to a minimum of 5 generations of German or Austrian heritage. It is recommended if further research is required to check with the Canadian Simmental Association and no assumption of Fleckvieh heritage will be guaranteed by neither consignor or the CSA.

BREEDERS GUARANTEE: Standard terms set forth by the Canadian Simmental Association, with the exception where any animal is subject to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

ACCIDENTS: Although every precaution will be taken to protect the safety and comfort of buyers, neither the sales staff, auctioneer or Anchor D Ranch or consignors assumes any responsibility in the matter and disclaims any liability, legal or otherwise in the event of accident or loss or property.
