It's that time of year again when we welcome you to the 2024 Edition of Pasture Treasures Sale. 17 years ago we decided to start this sale, hosting an event when the weather is usually nicer and you have way more time to get these bred heifers settled into their new environment pre calving. We are very pleased with this year's offering as they are a powerful set of females coming in working rig, as you would typically see them 365 days of the year.

Has there ever been a more exciting time to be in the cattle industry? Record prices seem to be normal on a steady basis. There is no point in posting what the cattle prices are as they seem to find a new high each week. With this strong of market we will see a big cull on cows again, shrinking the production end even more, strengthening the market even further. The demand for big performance cattle has never been higher, and with fewer cows in production the need to maximize weight will be evident. Once again makes you pretty proud to be in the Simmental business, where we can not only produce those big pounds efficiently, but can also have the maternal strength to raise them.

As in the past the vast majority of this year's sale will be composed of bred heifers, heavily influenced on the Fleckvieh side. We started with Fleckvieh cattle all the way back to 1981, and developed a core group of cow families in that time that reflect our focus on the industry. Our purebred division is much smaller in numbers; however we are very excited about where we have been headed to in this section. The addition of "El Dorado" has been exciting for us, as his first calf crop is simply amazing, and we were fortunate enough to have a daughter of his crowned Purebred Champion heifer calf at this year's National YCSA show. We are pleased to complete this year's offering with a few genetic lots, as well as a handful of cattle from some tremendous guest consignors. Top to bottom, there will be something for everyone.

As in the past a strong majority of our own heifers made their way through the AI pen for one cycle. We have been doing this the past several years, which has allowed us to be much tougher on assessing physical soundness, quality and temperament when we work with these heifers one on one. The heifers are also bred to proven calving ease bulls, with the exception of one new walking bull. These are bulls we feel will not only calve well, but also add value to the marketability of their progeny. All heifers were Ultra Sounded 28 – 60 days of pregnancy so we are very confident of the breeding information. Heifers have received safe guard, and will be rechecked to pregnancy prior to the sale to ensure they are settled.

For any guests traveling a distance new this year we are a part of three sales, starting off on Thursday at Black Gold, and finishing on Saturday at Beechinor Land & Livestock. This is a great opportunity to visit with fellow breeders and see some outstanding cattle in the process. For anyone unable to attend our sale it is a live event, and is not on internet. Anyone wishing to watch it can do so on the Anchor D Ranch Simmentals Facebook live page. Bidding is not available there. We encourage you to stop in prior to the sale for a tour and a visit. If you are unable to attend in person don't hesitate to call and discuss your needs with ourselves or any of the sale crew as they have been through and assessed the consignments. If we can be of any assistance please let us know. We look forward to seeing you October 11.

Our fall calving program is small, but we have been able to produce some pretty special cattle out of this section. "Kelly" is a female that combines style, pedigree, performance and comes in a Homozygous Polled package. "Creed" has certainly done his best to secure a spot in our program as an elite bull, and combined with the "French Attack x Barbossa" combination, well that is the same genetic explosion as the high selling "Abigail" from the World sale, selling to Double Bar D Farms, SK. "Kelly" is a female with a very exciting future, something very special here.

AI'd to Virginia Precision 16C -1135400- April 6. Exposed to Virginia Precision 16C April 21 to May 10. Ultra sound safe to AI, due January 16, 2025.

Not every mistake is a bad thing, and "Kloe" is living proof. Two of the sale bulls decided that a quick visit to the cow pen was in order and "Kloe" was the result of an unplanned mating. It was a fun surprise to guess which cows got bred and to who, but the results are in and "Swagger" you are the father. Ironically we have bred "Kloe's" dam to her grand sire "French Attack" before and she does happen to have one of the top bull calves in the pen from him this year, so getting bred to "Swagger" wasn't a bad thing. In fact it added another degree of an already great cow family into the mix in "Image 21J" who just happens to be one of our cornerstone females in our entire program. End of the day you are getting a big deep bodied broody female loaded with cow power and bred to our newest heifer bull "Intrepid". Good things are bound to happen here.

"Kehlani" is a female we are very stoked about. Her dam was a former high seller in our sale purchased by Canadian Donors. This young cow is absolutely flawless. This past fall at the World Simmental sale Garren sold a female that was "Creed x Barbossa x French Attack. Well that same genetic explosion is found in "Kehlani" just in a little different sequence. This cross works and trust me this female will be worth every penny. Her dam has an extremely bright future and her grand dam has proven her value to our program already. This is a powerhouse in the making and the breeding to "Intrepid" only adds extra value.

Exposed to BEE Intrepid 111L -1453495- March 26 to May 27. Observed bred April 5. Ultra sound safe, due January 15 or February 5, 2025.

This will be our final year of offering "Ulysses" daughters in our sale and "Kelsey & Cassidy" will lead the charge. "Ulysses" did a masterful job for us over the years, and now graces the pastures of Starwest Farms. If you have never seen this bull in person he is plumb impressive. Massive in body mass and possibly the easiest keeping animal we have ever owned. His daughters will have that same body capacity, lots of hair, and lots of growth and are phenomenal cows. The dam of these females is a beautiful young female who is highly productive. They started life small, and "Kassidy" was fostered onto another cow, but as you can clearly see they are not so little anymore. This is a big powerful pair of heifers that will certainly put some sale bulls in the pen or some fantastic females in the replacement pen. You can't go wrong with either or both of these exceptionally broody females.

Not exactly sure how this heifer ended up straight white faced, as both of her parents are heavily pigmented, but the most important part is still there, quality. "Keanna" comes from a strong cow family that ironically typically adds pigmentation. This is the same cow family that produced "Camouflage, Kings Ransom & Shazam" to name a few. There is tons of longevity built into this female as "Precision" completed another breeding season this year at age 9, and her 11 year old grand dam was selected as one of the females to be on display at the World Simmental tour we hosted at our place this past August. An early breeding to "Radioactive" could prove very valuable.

AI'd to FGAF Radioactive 030E -P1204413- March 23. Exposed to BHR Gannon G776 "Granbury, April 21 to May 10. Ultra sound safe to AI, due January 2, 2025.

It was a sad day last fall when the dam of "Kalentina" came in open. We all have those certain females we are fonder of, and this cow was one of those. She was a female who looked the part 24/7 and was admired by all visitors. Originally "Kalentina" was penciled in to be her mother's replacement, but numbers dictated otherwise. This is a female with exceptional length of spine, lots of eye appeal and an outstanding temperament. She will be a female that will mature nicely and will be an eye popper. Being bred early to "Radioactive" should produce a calf with added pigmentation, and added calving ease while still boasting enough performance. A female that should easily work into anyone's program.

AI'd to FGAF Radioactive 030E -P1204413- March 27. Exposed to BHR Gannon G776 "Granbury" April 21 to May 10. Ultra sound safe to AI, due January 6, 2025.

I may hear about "Kona" being in the sale from Grandma. I think she mentioned this heifer to me weekly about her being one of her favorites. Her dam is an awesome cow, who never misses and was certainly a standout at the world tour this year with her whopping "Creed" heifer calf at side. She also just happens to be a 3/4 sister to "Hitch" one of the herd bulls working at JB Livestock. This has been a great cow family for us, just steady and consistent. "Kona" will be a solid producing cow that I certainly expect big things from. Being bred back to "Radioactive" should truly be quite special. This may very well be one of the sleepers in this year's sale. I almost forgot to mention, she loves people, and she is a pet. Free advice, have a close look at her and don't let "Kona" sneak through the cracks, she will be worth every penny.

When we select sale heifers, there are always certain ones that we struggle with putting in the sale, as they are females we know would add so much value to our own program, but also realize those are the ones that must be in the sale. "Liberty" is without question one of those special heifers. We have retained a full sister to her in our own program, whose first calf sold for \$10,500 to Sagwich Land & Livestock in Oregon. Her dam is a female we purchased from Garren through this sale, and her mother is none other than "Clarabelle", Garren's very first show cow, who certainly needs no introduction. "Liberty" is a beautiful heifer, possessing great hair, heavily pigmented, dark hooved, deep bodied and broad topped. As an added bonus she is mated back to "Intrepid" who we are very excited about. The baby she is carrying could very well be a knockout. This is a very special lot.

Exposed to BEE Intrepid 111L -1453495- March 26 to May 10. Observed bred April 1. Ultra sound safe to observed breeding, due January 11, 2025.

"Luna" is an extremely attractive, long bodied feminine female. She is our very first "Yellowstone" daughter to sell. We are extremely pleased with the job he has done for us and his first set of bull calves were very well received, and his first daughters are top shelf. "Luna" has a very exciting pedigree. Her dam is a female we purchased from Garren, and is a granddaughter of "Jezebel" who I have stated more than once is my personal favorite cow on the whole farm. Our program is very centered on cow families and cow power. "Luna" is backed by numerous power cows. She is no accident and will no doubt be a powerhouse herself. This is a great one in the making.

A different blend of pedigree in "London". There is not an abundance of "Jungle" cattle out there. A bull who certainly adds performance and extra frame size, which is evident in this female. Her grand dam "Elexis" was a female we were very fortunate to have in our program, and still have a small embryo inventory on. Her biggest accomplishment for us was probably producing "Imax". He is a bull we still use in our program for his calving ease and excellent daughters he produces. "London" definitely offers a different twist and is a female that you can go several ways with. Lots of different options here.

We have used "Reputation" the past several years and have had a great deal of success with him. This is the lone daughter of his we have this year as we have used up our semen inventory. "Lelena" comes from a beautiful first calving "Fort Knox" daughter. We now have a number of "Fort Knox" daughters producing, and we are super impressed with them. "Lelena" may not be the prettiest female in this year's offering, but will certainly be a female that will add value for her new owner. Just a steady producing honest brood cow that will be highly productive.

We quite often find a blend that works and go back the same way for a few years. Then there are other cows we use as variety of different bulls just to switch up genetics. The dam of "Lucia" is one of those cows as she offers old school genetics and provides a whole different blend of genetics. We sold a sister to "Lucia" by "French Attack" in last year's sale to Croft Creek Ranch, BC. She came back with this powerhouse this year by "Fort Knox", and now has a wicked good bull calf by "Bowman" this year. Three outstanding calves in a row by three different sires. That's one of the appealing aspects of "Lucia" is the diversity she will offer. Bred back to "Precision" will certainly yield an outstanding calf.

AI'd to Virginia Precision 16C -1135400- April 7. Exposed to Virginia Precision 16C April 21 to May 10. Ultra sound safe AI, due January 17, 2025.

This is an extremely attractive female. Dark red, heavily pigmented, smooth fronted and from a great cow family. Her grandmother was an outstanding cow we purchased from Beechinor Bros, and her dam was her final calf. As I had mentioned this was a cow family that was super productive for us over the years. "Tawney" herself is a little more moderate and refined than the bulk of the "Ulysses" daughters tending to follow more along the lines of "Radioactive". The best thing is she will carry traits from both with the blended calving ease and refinement combined with sheer power and growth, with added muscle. The breeding to "Precision" should prove to be very complimentary.

 DOUBLE BAR D LOLITA 256X

The dam of "Lolita" is a very productive cow we purchased from Sunny Valley. This is a heavy milking, deep bodied female that can bring in a big calf every year. The "Precision" daughters probably don't get the praise they deserve enough. They are females that tend to keep birth weight in check but can still add growth. I look to this female to be a heifer that will moderate birth weights, maintain growth and be very easy fleshing in a mid-framed package. I think the breeding to "Gannon" will be a superb cross on her. He certainly made his presence known in both the bull sale and female sale last year. He does only have one daughter in this year's sale as we sell many services to him so we tend to not have as many of his calves for ourselves. This will be an outstanding cross.

Exposed to BHR Gannon G776 "Granbury" -P1404821- March 24 to May 10. Observed bred April 8. Ultra sound safe to observed breeding, due January 18, 2025.

We had sale tagged the heifers for the World Tour, so this lot is a bit out of place in the catalogue, replacing a female that had to be pulled. Regardless of what ever lot number this is, this is truly an exceptionally elite lot. We have only ever sold 2 embryos before on "Ziley", when we offered pick of the tank for the mystery lot one year, selling to XRC Simmentals. "Ziley" has been a pretty good cow for us to say the least. Her offspring have averaged just shy of \$25,000 and is most likely known as the dam of "Raptor". We have only had one full sibling to these embryos to date, "Abracadabra", who was the lead off bull this spring, selling to Stone Simmentals for \$24,000. "Creed" certainly needs no introduction as he has already done great things for our program, and anchored the lead off sire group at this year's World Simmental sale where his three direct offspring sold for \$88,000, \$80,000 & \$30,000. These embryos are stored at DRI and are Canadian or USA exportable. This is something truly special.

"Lauren" should be a very easy heifer to find sale day. A super dark dark red smooth polled heifer with extra performance. The "Sheamus" cattle will give you a lot of extra punch, and added muscle shape, with a large percentage coming polled as well. "Lauren" is a twin, and her twin sister was also slated to be in the sale but dumped her baby right after the World Tour. I know several people had commented on this outstanding pair of heifers, which their mother did an incredible job on raising them both. She bred right back and has a front end bull calf this year. A very nice heifer that carries the service to "Gannon". Look for a dark red baby that has the potential to also come homozygous polled!!

Exposed to BHR Gannon G776 "Granbury" -P1404821- March 24 to May 10. Observed bred April 8. Ultra sound safe to observed breeding, due January 18, 2025.

It's not like this is something new, in fact quite the opposite. Tried tested and true. The "French Attack" daughters are quite easily some of our very best cows. To this point the dam of "Lylah" has only given us heifer calves. Her first daughter sold to Northwind Ag Ltd, SK her 2nd, 3rd and 4th have all been "French Attack" daughters. #2 was retained by us; "Lylah" is #3, and #4 looks to be one of the top heifer calves this year. Her grand dam was also bred several times to "French Attack" which resulted in "Hibiscus" who was our high selling heifer the year she sold going to Faulkner Farms, Arkansas. A very proven track record indeed and mated to "Radioactive" will be phenomenal.

AI'd to FGAF Radioactive 030E -P1204413- March 22. Exposed to BHR Gannon G776 "Granbury" April 21 to May 10. Ultra sound safe to AI, due January 1, 2025.

We have pretty much gotten into the routine of AI'ing the bulk of the heifers for the past several years, on natural heats. The only drawback to that is if we miss one in heat detection, which is the case with "Darby". So yes she is bred a bit later than most in the sale but of no fault of hers. This is a big powerful polled female with added frame. She is a female who comes from an outstanding cow family. Her dam is a no miss female who was sold last year in a package of females going to Champ Simmentals. She will do great things for them as well. For anyone not wanting to calve earlier but wanting to add a polled powerhouse into their program, "Darby" is unquestionably the ticket.

Exposed to BHR Gannon G776 "Granbury" -P1404821- April 21 to May 27. Observed bred May 15. Ultra sound safe to observed breeding, due February 23, 2025.

"Loretta" is a very complete package. She is a very well balanced female that comes from a nice young cow we purchased from Michael Maronda. She has a combination of calving ease as well as power throughout her pedigree, balanced with high maternal qualities. You will note her exposure date is a little longer than the bulk of the females, as she wasn't confirmed safe on the first preg test so we didn't want to send her to pasture and miss her getting bred. The combination to "Granbury" should be very complimentary as we have used him for a few years now, and he seems to cross very well on the "Precision" daughters. A very solid heifer with a very safe breeding.

Exposed to BHR Gannon G776 "Granbury" -P1404821- March 24 to May 27. Observed bred April 13 & May 1. Ultra sound safe to May 1, due February 10, 2025.

"Lavander" is another female that traces back to the "Image 21J" cow family. Her grandmother "Aegina" was absolutely one of my favorite cows that ever worked here for us. "Lavander" is going to develop into a deep bodied broody female, that should be very easy keeping. Typically we don't breed huge numbers of heifers to a new heifer bull but we feel pretty confident in "Intrepid". I think this particular cross will be very very good and bring out the best in both. I'm excited about the future of this young female and the baby she carries inside.

We now have several "Fort Knox" daughters in full production, and they are really nice cows. "Loreenna" comes from a very productive cow family that stems back to "Bar None Lois". This was the main cornerstone cow for Richmond Farms, and we were fortunate enough to acquire a couple of her granddaughters over the years, both of which made a huge contribution to our program. "Loreenna" also traces back to a couple of tremendous bulls for us in "Intuition & Windsurfer". We never really used these two as a cross much but when we did it worked well. This will be a female that should have a flawless udder, great feet and strong fertility. She will be as honest as the day is long, and be a solid choice in anyone's budget. AI'd to FGAF Radioactive 030E -1204413- March 30. Exposed to BHR Gannon G776 "Granbury" April 21 to May 10. Ultra sound safe to AI, due January 9, 2025.

Full Sisters

Over the years there has been quite a bit of trading take place when the kids picked show cattle. Well the dam of these two heifers "Ember" was on the reverse side of the swap, as she was what we ended up with when Mackenzie chose a show female. This has been an awesome cow for us, and is a daughter of her original 4H female "Candy". This is a pair of heifers that could have just as easily been in our own pen. A very solid pair of heifers that will be outstanding brood cows. Nothing super flashy, just the type that will "Getter done" time and time again. Both bred plenty early to different sires so giving a few more options as well. Certainly value to be found with "Lizzy & Libby".

We have really learned to appreciate how good these "Imax" daughters are over the years. We first started using "Imax" simply for his calving ease, as he has been very consistent in being an easy calver but also leaves a very marketable calf in the process. Over time the "Imax" daughters have proven their value time and time again as being some of the highly productive cows that also moderate birth weight and leave a strong majority of their offspring being polled. The udders on these females is as near perfect as you can find. "Abba" comes from a really strong cow family for us that has a stacked pedigree. This female has as well balanced pedigree as you will find, blended from top to bottom to contribute the best. As solid of female as you will find.

"Lamma" is a moderate framed female who comes from a very nice young "French Attack" cow, that goes back to "Great Guns Mitzi 11X". This is a female that will maintain show condition year round, as the entire cow family does. She is catalogued as a "Sarge" daughter, but I think she is actually a "Yellowstone". When going through my records I had wrote down to Parent Verify her as her mom got moved when we were breeding for some reason (I don't recall), anyways she was with "Sarge" but got moved to "Yellowstone" and I didn't send in DNA before we were cataloguing. Info will be back before the sale. So honestly this is a bit like Christmas to see what we will get. I really feel as though this heifer will be a bit of a sleeper sale day and with time will develop into a fantastic brood cow. We think she probably had stuck to her initial breeding and then dumped early on so is bred for a mid-February calf. Regardless of when she is bred she should develop into a magnificent cow.

Exposed to BHR Gannon G776 "Granbury" -P1404821- March 24 to May 27. Observed bred March 24 & May 2. Ultra sound safe to May 2 breeding, due February 11, 2025.

We now have a small sample of "Bowman" daughters producing, and they are wicked good. "Layanne" will undoubtedly become a super star. Her dam is as picture perfect as you can design them and her pedigree is pretty darn impressive. A direct daughter of "Romulus & Dorothy Jane". She has the pedigree to say she is a brood cow, and that she certainly is. There is zero doubt in my mind that "Layanne" will become a front pasture cow, and the longevity in her pedigree says you better like her because she will be with you for a long long time. We also feel the mating to "Intrepid" will be very complimentary. This will be a solid addition into any herd.

AI'd to BEE Intrepid 111L -1453495- March 26. Exposed to BEE Intrepid 111L March 26 to May 10. Ultra sound safe to AI, due January 5, 2025.

"Lori" is my personal pick of the "Sarge" daughters. She has been a standout since she was a calf and is a female I would have dearly loved to have kept for ourselves. This heifer is one of the thickest broadest topped females in the offering. She is very angular and has tons of capacity. I love this heifer now but can only imagine how good she will look when she like a 5 or 6 year old cow with a big strapping bull calf at side. There isn't a thing I would change on this female and she will without question be one of this year's feature lots.

AI'd to Virginia Precision 16C -1135400- April 5. Exposed to Virginia Precision 16C April 21 to May 10. Ultra sound safe to AI, due January 15, 2025.

"Leslie" is the lone "Granbury" daughter in this year's sale. Both his daughters & sons were extremely well received last year. He calved so well for us he was used last year solely in the heifer pen, not getting any cows, and because of that we had less calves from him ourselves. "Leslie" is a heifer that is really starting to develop very nice. She will have a picture perfect udder, and with her pedigree combining "Granbury, Barbossa & Legend", there is zero doubt calving ease is very much locked into this pedigree. She also comes in a polled package and mated back to "Intrepid" should result in a dandy.

Exposed to BEE Intrepid 111L -1453495 - March 26 to May 10. Observed bred April 4. Ultra sound safe to observed breeding, due January 14, 2025.

Another "Bowman" daughter with a really nice pedigree. We sold a small group of females to Bovey Family Farms, ON last year, and the dam of "Lorraine" was one of those females. She is a direct daughter of one of our original foundation females "Desiree" and "Houston". Certainly some old school pedigrees there and genetics that just work. We have been super impressed with the "Bowman" offspring, regardless of bulls or heifers. "Lorraine" won't be the shiny jewel sale day but will no doubt raise several in her time and I do really like how we have her bred back. I think a "Gannon" calf could pay for the whole investment.

Exposed to BHR Gannon G776 "Granbury" -P1404821- March 24 to May 10. Observed bred April 6. Ultra sound safe to observed breeding, due January 16, 2025.

We purchased the dam of "Lyra" from Dobbie Simmentals, and this is the baby she was carrying at the time. Her sire "Hefner" was our high selling bull in the respective year he sold, and as you can see her pedigree all stems from our breeding program. She does have a double shot of the "Desiree" cow family, as well as some of the great bulls of the breed in "Legend, Barbossa & Solway Adonis". A heifer with a solid pedigree and coming in a homozygous polled package. Bred back to "Gannon" is very exciting indeed.

Exposed to BHR Gannon G776 "Granbury" -P1404821- March 24 to May 10. Observed bred April 2. Ultra sound to observed breeding, due January 12, 2025.

To be quite honest this is a female I had zero intentions on parting with. I have always admired this heifer and the fabulous cow family she comes from. Her great great grand dam was a cow we purchased from the Arnold Brothers dispersal and to this day one of our biggest regrets is that we never flushed this cow. She was a mature female when we bought her and in her time here she left us three females. Those three daughters in turn have developed into one of our largest cow families on the farm. "Elvira" will have a picture perfect udder, complete with pigmented teats, flawless feet which are also pigmented, will be extremely easy keeping, super broody and angular. We don't part with an overabundance of "French Attack" daughters, and the fact that "Elvira" is polled just makes her that much more intriguing.

AI'd to FGAF Radioactive 030E -P1204413- March 28. Exposed to BHR Gannon G776 "Granbury" April 21 to May 10. Ultra sound safe to AI, due January 7, 2025.

"Leyla" is a big powerful polled heifer, coming from an exceptional young "Antonius" daughter. We are very happy with the job "Sheamus" is doing for us, as his offspring possess extra power and size as well as added muscle, while many of them are polled as well. "Leyla" is one of four females we must have simply missed heats on, so we gave them a CIDR and set them up for a late AI, with a late exposure as well. I have high expectations of this heifer as pedigree and type all stacks up indicating she should be a super star.

"Laura" is a smooth polled "Sarge" daughter that I grow to appreciate more and more each day. This is a heifer that the more you stop to analyze her the more you appreciate how complete she is. Big and broody, yet very smooth and angular. Her dam was our top pick out of the Gagnon herd the year we bought her as a bred heifer and absolutely hit a home run with her first calf, a bull selling to Diamond Rio Ranch. I honestly think this is going to be a super easy heifer to breed as I am sure she will work with any type of bull you use on her. Why gamble at Vegas, when you have a sure thing right here.

We only have two daughters of "Righteous" in this year's sale. He is a bull that was to be one of our feature bulls as a yearling and we did write in the footnotes he was a bull we would be interested in incorporating back into our own herd. Well he must have read the footnotes as he ended up being a late scratch from the sale, so we used him for a couple years as cleanup in the heifer pen before he went to work for Blair Torgerson. This will be an outstanding momma cow, and is absolutely stacked with cow families on both sides of her pedigree. She is a heifer we missed on the first round of AI, so was bred a bit later, but did settle to her first service. "Lucille" will be one awesome cow.

On paper "Laney" is without question a favorite of mine, and in the flesh she measures up to expectations. I can't say enough good things about the "French Attack" daughters, and "Brittany" is one of my favorites in the herd. Her dam "Becca" was bred this way 5 times producing 4 bulls that all stood in the front of the pen come bull sale time and "Brittany". The cross with "Bowman" is fantastic and this is a heifer I would expect to hit home run after home run. The breeding to "Radioactive" will be very good, but zero doubt that this will be a heifer you can breed back to anything and expect a good one.

AI'd FGAF Radioactive 030E -P1204413- April 5. Exposed BHR Gannon G776 "Granbury" April 21 to May 10. Ultra sound safe to AI, due January 15, 2025.

"Lucy" is a larger framed female that certainly possesses extra power. Her dam has been a very good female that Mackenzie purchased from Kindred Spirit. She has produced two sale heifers in the past one selling to Suter Silverado Simmentals, SK and a high seller in last year's sale selling to Beechinor Bros & Haney Bros. She didn't settle to her AI and we didn't see her rebreed, however the ultra sound indicates she will be calving early to mid-February. Mated back to "Granbury", who just so happens to be the sire of the fore mentioned high seller of Mackenzie's from last year selling to Beechinor's & Haney's. Perhaps its fate and was meant to be that way. The baby she is carrying may very well be the next great one.

AI'd to Anchor D Imax 250Y -P753794- April 2. Exposed to BHR Gannon G776 "Granbury" April 21 to May 27. Un-observed. Ultra sound safe for approximate first week of May breeding, due mid-February, 2025.

Where's the power? Here's the power. WOW!! "Luna" is a full sister to one of Mackenzie's show cows, "Jasper" who is unquestionably a favorite of hers. As already mentioned if you are looking to add power, frame and growth, this is the one for you. Her dam is a powerhouse that never disappoints. This is a great cow Mackenzie bought from Ralph Burns and has a wicked pedigree to go along with her. We have used "Imax" as a calving ease bull but sometimes the mating are just so much more than we bargain for. I think the breeding of "Luna x Imax" is going to be as good as it gets and could be a home run. Have a good hard look at this heifer she is on point.

AI'd to Anchor D Imax 250Y -P753794- April 9. Exposed to BHR Gannon G776 "Granbury" April 21 to May 10. Ultra sound safe to AI, due January 19, 2025.

"Lacey" is from a first calving heifer Mackenzie purchased from us as a bred heifer. She will be a moderated framed female, as most of the "Radioactive" females are. They tend to be very easy keeping, nice uddered, great dispositions, with lots of hair and good feet and leg structure. The dams side of the pedigree has been as solid of producing cow family for us as we have, raising some top end bulls along the way. Nothing overly fancy with this heifer, just straight goods. She will be a female that will give you a great return on investment. The mating to "Gannon" should be quite good.

Exposed to BHR Gannon G776 "Granbury" -P1404821- March 24 to May 10. Observed bred April 1. Ultra sound safe to observed breeding, due January 11, 2025.

I am really excited about this heifer in this year's sale. Not only is she good, and the fact that her dam is raising a full sister that is every bit as good or better, but the fact that she comes from Corey and how excited he is about her. For those who don't know Corey, he is our soon to be son-in-law. He's not new to the family, he's been a part of our family for some time, it's just that it's going to become official. This is one of the top "Sarge" daughters, and comes from the same great cow family that produced "Viper". Certainly a female that should be marked high on your wish list.

"Sara" is the only "True Grit" daughter in the sale. He is a bull that we sold several years ago to Blushrose Simmentals, SK and went on to be a great bull for their program. We purchased a bit of semen on him and look forward to more calves from him in the future. This female is double bred in the "Image 21J" cow family, who without question has been one of our very best cow families, and then combined with the "Herlinde" cow family as well. You can never have too much of a good thing and this is a pedigree that is as good as it gets. She likely won't be the first female you find sale day, but she will be an absolute rock solid cow, that will gether done. Exposed to BHR Gannon G776 "Granbury" -P1404821- March 24 to May 10. Observed bred March 24. Ultra sound safe to observed breeding, due January 3, 2025.

"Merabelle" is a power house. When we selected females that were potential candidates for the World Simmental sale we wanted to have a few options for back up plans just in case. "Merabelle" was Garren's choice so I think that is a pretty strong endorsement as to what we think of this female as well as what her potential to influence the breed will be. This heifer is as solid as they come, with a pedigree that is as hot as it gets not only in our program but the breed right now. "Creed" made a huge impact at the world sale and is aging like fine whiskey only getting better and smoother with time. Remember the name "Merabelle" she will have a large impact in the breed.

AI'd to Anchor D Imax 250Y -P753794- April 1. Exposed to BHR Gannon G776 "Granbury" April 21 to May 10. Ultra sound safe to AI, due January 11, 2025.

For those of you who really study and appreciate pedigrees have a look here. This is the exact same base pedigree that really jump started Garren's program. It all started with "Tyra" the original cow we gave Garren. She has been gone for a few years now, but to have an opportunity to buy a granddaughter is very unique, and something that doesn't just come along every day, as her daughters are certainly creeping up there in years now as well. Now add the fact that "Tara" is a "French Attack" daughter and this lot just gets better and better. Free advice you don't even have to see her to know she will be good. Swing for the fence this will be an elite female.

AI'd to FGAF Radioactive 030E -P1204413- March 27. Exposed to BHR Gannon G776 "Granbury" April 21 to May 10. Ultra sound safe to AI, due January 6, 2025.

We don't have huge numbers of "Bowman" females in the sale, but we are very pleased with the ones we have. They are developing into outstanding cows for us. Easy keeping, soft made females, with lots of milk and performance. "Lioma's" dam has been as honest of producing cow for Garren as he has owned. She was the grand dam of "Cowboy Up" the bull calf he showed at the National YCSA show, where he was named Reserve Champion Fullblood bull calf. This bull has really exploded this last month and will no doubt be a feature bull in this spring's sale. Great female bred back right.

"Jazz" is going to be one hell of a cow. Tremendous cow families on all quadrants of her pedigree. Not that we have many of these "Righteous" heifers but I expect they will become exceptional females. We had 5 full brothers (including him) with 3 working in purebred herds. The "Barbossa" cows are by far some of our most productive females and with such a limited supply of semen on him daughters or granddaughters have that much more value. On the dams side this is a cow family that just simply works. Everything stacks up exceptionally well here and then bred to our new heifer bull "Intrepid", this could be something special.

Exposed to BEE Intrepid 111L -1453495- March 26 to May 10. Observed bred April 1 & April 23 Ultra sound safe to April 23 breeding, due February 2, 2025.

"Maybelle" is a female I honestly never paid that much attention to earlier on, and then mid-summer I thought where in the world did she come from. Just stop and do a quick analysis of her, she is as close to fault free as they come. Interestingly enough one of my favorite heifers in the sale is lot #9, who just so happens to be a full sister by blood as they come from full sisters. Now add the combination of "Radioactive" and you have an all-star. This is an awesome female.

"El Dorado" will have the honors of being this year's lead off lot to our purebred division. We felt the need last year to find that elite bull for our Purebred division that could take us to the next level. I feel as though we have accomplished that. His first calf crop is simply impressive. Lots of shape in these cattle, structural integrity, phenomenal growth and the dispositions are spectacular. Not that our kids have shown many Purebreds over the years, but this year we were fortunate enough to have the Grand Champion Purebred heifer calf at the National YCSA show with an "El Dorado" daughter. We are extremely excited about his bull pen that will sell this spring as they have already created a buzz. We sold 5 semen packages on him last year exclusive for 2 years with another 15 straws sold in our female sale last fall. We will be offering another 3 packages of 5 again this year, and this is the only additional semen that will be sold this year, so we are able to keep him somewhat exclusive. Semen is stored at Alta Genetics and is exportable. Get in on one of the hottest new bulls on the market.

This is a heifer I have always really liked and I don't think really got appreciated as much as she should have as we unfortunately lost her dam on grass so "Shakira" was orphaned and did a pretty darn good job on her own. Her dam was a really nice young cow Garren purchased as a bred heifer out of Gagnon's fall production sale. We have had a lot of success with these 1/2 Fleckvieh Purebred females. "Shakira" is our very first "Cinderella Man" heifer to sell and I am super impressed with them. This is a very feminine heifer that is very angular, soft made, and just has that cow look about her with a picture perfect udder being developed. I think this is a heifer that will be missed as she is really starting to blossom into what I truly think she will become.

"Aero" is our first "Capacity" daughter to sell. A very nice put together heifer with a very nice pedigree going back to the "Harlow" cow family from Lewis Farms. Her dam has a very solid "El Dorado" bull calf at side and will no doubt be a favorite this spring. Lots of performance in this pedigree, but also has a nice balanced blend to moderate birth as well. I think this is going to be one of those females you can literally breed to any type of bull and just expect to get something pretty special. High probability the baby she has in her will be a moderate birth weight black baldie. Bull or heifer it should be quite marketable.

"Raven" was purchased in dam from LaBatte Simmentals. This was a beautiful young female that certainly had her fair share of friends sale day, and ended up being one of the high sellers. Certainly lots of calving ease in her own pedigree and a female you will be able to throw big horse power at to blow them out of the park. The breeding to "Pillar" should be quite special. He is a bull we learn to appreciate more all the time as he provides huge growth but calves exceptionally, a true curve bender. I like "Raven" well enough but I think the real ticket here will be the baby she carries in side. This could be grand.

"Kahlua" is going to be one big powerful cow. We haven't had an abundance of "Betts" cattle ourselves; however he is certainly no stranger to the industry. The dam of "Kahlua" is a tremendous cow we purchased from the Beagle dispersal as one of the high selling lots in their sale. This is a female that has certainly lived up to her expectations. Being mated back to "Sleep Easy" should result in a super marketable calf. She is bred a bit later as she is one of the females we simply missed a heat on. I think the future for this female is extremely bright.

As I had mentioned in an earlier footnote we really have liked to blend our Fullblood and Purebred genetics, allowing us to essentially introduce new bloodlines, but bloodlines that are highly proven. A few years ago we bred all our black Purebred heifers to "Barbossa", and the dam of "Kenna" is one of the resulting calves. "Kenna" is a blood red female that will offer additional calving ease, sufficient growth, excellent structure and added milk. I have pointed out before in our bull sale "Barbossa" himself didn't sire huge numbers of our high sellers; however his daughters and granddaughters raised a high percentage of them. Start with a cow, build a family and raise what you want. This will be a bull making machine.

Another purebred heifer with a shot of Fleckvieh in her pedigree. Her dam ended up coming in open this fall, so I have to admit I was a bit sad we had "Leonora" in the sale. Her dam was a 12 year old cow that never missed a beat. The type of cow that was problem free, and you just relied on to bring in a good calf. She is sired by our "Whiskey" bull who is doing a very nice job for us. This is a female that you won't break the bank to own, as she is a bit plain colored, but the old saying never judge a book by its cover certainly applies here as this will be a very solid producer. I said to a young up and coming cattleman the other day, when I started I bought some of these not as cool female that were backed by cow families, and started to build from there. For lack of better terms this female would be an incredible starter package. Free advice of the day.

We purchased the dam of "Liliana" from Maxwell Simmentals and she was the calf that cow was carrying at the time. She is a nice young cow who looks as though she will have a positive impact on our program. We bred "Liliana" to "Pillar" a bull we have used the past several years, and have started to use him that much more in the heifer pen. He calves extremely well, and his offspring have lots of power and growth. This is a nice young female who should be a solid producer. She was not tested, but will be Homozygous Polled by pedigree.

Our high selling Purebred heifer last year was a big powerful Black blaze faced heifer that sold to Deeg Simmentals. She just so happened to be a full sister to "Layan", and honestly this heifer was never supposed to be in the sale, as this is the last calf crop for "Matador". I never had intentions on parting with her but we need to sell the best, and this heifer is a strong representative of where we are going. Her dam is a beautiful cow and her grand dam would rank as one of my top picks in our black cows, with a pedigree that certainly works as well. The breeding to "Pillar" just completes the whole package. Have a close look here, a few tears may be shed, she's the right kind.

Our final female in this year's sale comes to us via the Sun Rise Simmentals dispersal. You've already read more than once about our beliefs in the strength of cow families and how much we appreciate "Pillar" so when an opportunity arose to purchase his full sister we took advantage. In my opinion she had one of the very best heifer calves in the sale, and talking to Evan he praised how productive this cow was. So here is a chance to buy in on a proven cow family but also mated back to a bull equally as proven in "Top Tier". Also keep in mind with very limited semen on him available, this is something quite special.

AI'd to WLB Top Tier 456G -PG1288193- April 3 & April 23. No exposure. Ultra sound safe to AI, due February 2, 2025.

Consigned by Stout Brothers Simmentals - Carolyn is a big broody, strong footed powerful female that is without a doubt the best black female we have ever offered. She combines tremendous depth and volume while still maintaining her femininity throughout. Mothered by a good uddered heavy milking Cobra female that has an awesome red heifer calf by Powerplay again this year. We haven't used a lot of Powerplay but the calves we have had have been very good and well received with visitors. The mating with Pillar is one we think will click and complement Carolyn very well. Carolyn is a heifer that we hate to see go but look forward to following her wherever she ends up. If you're looking for a herd bull producer, here she is!

AI'd to Sun Rise Pillar 3D -1164525- April 3, 2024. Exposed to STBS Radon 8H, April 14 to May 22. Ultra sound safe to AI, Due January 14, 2025

Consigned by Stout Brothers Simmentals - Lorette comes from a beautiful Open Range daughter that is the front pasture kind and is starting to put up an impressive track record. She has produced a daughter that sold through this sale to Kin Kin Cattle Co. the Chitticks, a full sib to Lorette in our bull sale to Portiek Simmentals, Lorette, and another top bull calf at side this year. Her sire Standout needs no introduction, standing the test of time and still producing highly sought after bulls and tremendous females. Long bodied and added frame, Lorette won't be the fanciest heifer sale day but has the credentials to get the job done. Bred up to FSS Hendrix for a guaranteed polled calf. A cross that we have used on Standout females that flat out works. Lorette will be well worth the investment.

AI'd to FSS Polled Hendrix -1399853- April 4, 2024. Exposed to STBS Radon 8H, April 14 to May 22. Ultra sound safe to AI, Due January 15, 2025

Consigned by Stout Brothers Simmentals - A red blaze faced heifer with a different twist on pedigree for red genetics. We used Reputation on a few solid red females to create the sought after blaze faced cattle and it worked very well. Josie's dam is a result of some embryos we purchased from the McIntosh's on their famed Mary Jane cow, and we are sure glad we did. We got two calves, Josie's dam and a bull calf that topped our 2022 bull sale. Josie is a moderate framed, good footed, easy doing type female that looks to be setting up a terrific udder. Bred up early to the calving ease bull KWA Can-Am, this should provide an exciting first calf and a quick ROI.

AI'd to KWA Can AM 123H -1334084- April 4, 2024. Exposed to STBS Radon 8H, April 14 to May 22. Ultra sound safe to AI, Due January 15, 2025

Consigned by Skylark Cattle Co. - Lady Cavill is the total package! Power, performance and calving ease all wrapped up in a very tidy package! With the likes of Canyon, Wow Effect and Cajun Neff, her pedigree is a very cool twist of new and old! Lady Cavill came in dam when I purchased Applecross Cassidy 26K last fall. If my walking herdsire wasn't a Cavill son, she would be staying here as she is an absolute beauty! Her balance of femininity, natural muscling ability, pear shaped body and docile nature are just some of the traits that make her destined to be a great cow! Her dam has exceeded all expectations on her first calf while keeping a tidy level udder and body condition on a very lean grass year while still raising a big calf. There is not much I would change about Lady Cavill, except for keeping her in my replacement pen! Take a long good look here!

Consigned by Skylark Cattle Co. - If I had one word to describe this heifer, it would be booty-full! Mystique is one of those heifers that gets you incredibly excited and one you are proud to bring to town. She has an incredible amount of hip muscling that extends down into her belly. A long spine, excellent width of top and spring of rib while staying smooth throughout her front makes her a very eye appealing female. This heifer truly is a brood cow in the making and if she is anything like her dam, her new owner is in for a treat. BEE Branda 951G is a true brood cow, catching to her AI every year while having a great udder and feet. Narcissus adds a shot of maternal abilities and longevity. Mystique's half sister sold through this very sale last year to JEM Simmentals. Mystique will be easy to find sale day, especially being the pet of the pen. She is a special one, look close here!

Consigned by Skylark Cattle Co. - Mesa is the first female on offer from my new herdsire, Waldron Konan 102K. The Konan progeny are nothing short of COOL and are often the first calves picked out by visitors. The natural muscling ability these calves display at a young age is second to none and Mesa is no exception! A smaller framed heifer, she packs a ton of WOW factor into a stylish body. An incredibly soggy heifer with great length of spine, hip muscle and femininity; she is honestly hard to miss. Her dam, SKY Lady May 211K, is a first calf heifer with a picture-perfect udder and is a spitting image of her calf. Mesa's grand dam is Anchor D Farissa 242F who honestly has been one of my best female purchases. When Danny said this cow family are workhorses...he was not lying! Proof is in the pudding here and one I would entice everyone to dive in. Mesa like all the Konan/Farissa progeny has an incredibly quiet nature and would make a fantastic junior project. If you're in the business of making money and eye appealing cattle, look no further!

It's been several years since we sold any "French Attack" semen. We have sold a small amount in the past, but it has been kept relatively exclusive. Not much we can say that he hasn't already said for himself. This is without any question the BEST bull we have ever walked at Anchor D!!! Both his sons and daughters are exceptional, and at 9 years of age he is still servicing one of the largest breeding groups. After all these years his offspring are still well over a \$10,000 average for us and has over 300 registered offspring in Canada, not too shabby. There is ZERO guess work here. We have truly been blessed to have had such a special individual be a part of our program for so many years, it's time to share a little, take advantage. We will offer 3 packages of 5 straws if the buyer wishes to purchase additional semen they may do so. Semen will be Canada or USA exportable and stored at Alta Genetics.

"Creed" certainly made his presence known again at this year's World tour and World sale. After many inquiries about semen we felt we would offer a limited amount for sale. We have offered semen for sale on him in the past through this sale in the same way we will do so again this time. Only 3 packages of 5 are going to be made available just to allow for exclusivity in this elite bull. We always look for that next piece of the puzzle and "Creed" has certainly fit into that role for us, as he has secured his position in our breeding program. To date 22 offspring have sold for just over a \$26,000 average. This bull is the real deal, and has the potential to be a game changer. Semen is stored at Alta Genetics and will be exportable.

"Radioactive" is a bull we have confidently used in our heifer pen now for several years. We have been really pleased with how well he calves, but somewhat like "Imax" we are really seeing the true value in him through his daughters as well. You never really know how good of a bull you have, in my opinion, until you get a few years of offspring into production themselves. His offspring are low maintenance cattle, very easy keeping cattle that possess great foot and leg structure, nice hair, and tremendous dispositions. His daughters have flawless udders, and his sons seem to have more than enough testicle development. Besides being a bull that has worked well for us on heifers we have also used him on some power cows that we may want to tone down some birth weights on, and moderate a bit but not lose any power in the process. He has worked extremely well in this capacity as well. It's always tough herd bull shopping but even tougher finding that great heifer bull. "Radioactive" fit the bill and even after losing him at an early age, we confidently continue to use him in our heifer pen. His semen bank is starting to deplete a little so we can't say if this will be the last we sell, but it will certainly start to become a bit more limited. 3 lots of 5 per package will be offered and semen is exportable stored at Alta Genetics.

Consigned by Estes Ranch - A wise man once told me in the cattle business you need to be good, but also lucky to produce a great one. When Sara and I walked in the old BHR office in Granbury, Texas one night, little did we know luck was on our side! Luck helped select a set of embryos out of numerous different matings that ultimately resulted in Estes Top Gun. Since the moment he hit the ground he has exceeded every expectation we had for him. He is 100% Fleckvieh, homozygous polled, non dilutor that is proven safe for heifers. Top Gun is not just a heifer bull, but his calves have excelled in both the bull pen as well as producing top quality females that have topped sales in the US. If you study his video, you'll find that not only is Top Gun a powerful easy keeper, but he is a very sound and fluid moving bull. You can't go wrong investing in a bull like him! Selling 3 lots of 5 units!

Anchor D Ranch Simmentals Influenced Calf Sales

One thing we are always trying to do is figure out ways to add value for you, our customers. For the past several years we have been hosting the "Anchor D Simmental Influenced Calf Sales", the first week of October. This allows feedlots to purchase large groups of calves with similar genetics, and health protocol in a timely fashion or producers wanting to capitalize on acquiring top end replacement females. This also allows for maximum dollars to be realized as it is added value for both buyer and seller. We are pleased that we will now be adding Charolais calves into the mix this year as well, so be sure to take advantage. For anyone interested in becoming a part of these sales please contact Dan for more details.

- Tuesday, October 1, 2024 – VJV Rimbey, AB**
- Wednesday, October 2, 2024 – VJV Ponoka, AB**
- Thursday, October 3, 2024 – VJV Westlock, AB**
- Friday, October 4, 2024 – VJV Dawson Creek, BC**

TERMS & CONDITIONS

TERMS: The terms of the sale are cash or cheque payable in Canadian Funds at par immediately following the sale. The right of ownership shall not pass until after settlement is made. All settlements must be made before any livestock will be released.

CERTIFICATE OF REGISTRY: After settlement has been made the buyer will be provided with the proper registration papers, duly transferred on the record of the Canadian Simmental Association. Further transfer to the herd books of other countries shall be at the buyers expense.

DELIVERY: Delivery will be made to purchasers in Central Regions of Western Canada, at the convenience of Anchor D Ranch, and buyers risk. Any animals going to other areas, trucking will be arranged by Anchor D Ranch at cost.

FLECKVIEH STATUS: Full Fleckvieh will be considered as Fullblood cattle tracing back to a minimum of 5 generations of German or Austrian heritage. It is recommended if further research is required to check with the Canadian Simmental Association and no assumption of Fleckvieh heritage will be guaranteed by neither consignor or the CSA.

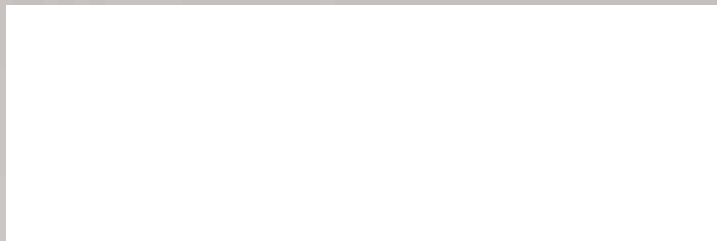

BREEDERS GUARANTEE: Standard terms set forth by the Canadian Simmental Association, with the exception where any animal is subject to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

ACCIDENTS: Although every precaution will be taken to protect the safety and comfort of buyers, neither the sales staff, auctioneer or Anchor D Ranch or consignors assumes any responsibility in the matter and disclaims any liability, legal or otherwise in the event of accident or loss or property.
